BIZAUTOMATION CLOUD ERP

EXTENDED PROFILE

BizAutomation

OVERVIEW

BizAutomation cloud ERP is a system designed to streamline back-office operations. It is fully integrated with other BizAutomation products to enable all business functions to operate through a single platform to increase efficiency.

Focusing on automation and simplicity, BizAutomation cloud ERP is suited for SMBs with needs to increase productivity while allowing management of several separate business functions through a single platform.

The software has extensive manufacturing and distribution tools. Warehouse management tools allow control of multiple external locations, along with internal locations such as aisles and shelves, meaning BizAutomation cloud ERP keeps businesses informed of requirements on a real-time basis. This helps prevent wastage and increase revenue.

Minimal involvement is required at each stage of the sales process, with a simple “one click” sales fulfillment process finishing off orders quickly following creation and a variable pricing and promotions system which adapts based upon analytics and reports from historical data and preceding months. Through an automated shipping process, integrated with parcel shipping services including UPS, FedEx, and USPS, BizAutomation cloud ERP aims to expand and improve on existing functionality, while also allowing businesses which already use these services to continue operating without skipping a beat.
