

VISUAL ERP.NET

EXTENDED PROFILE

OVERVIEW

VisualERP.net is an ERP software solution, from VisualNext, that caters to retail and manufacturing companies in the fashion and soft goods industries.

VisualERP.net is built on the latest Microsoft technologies including SQL Server and Silverlight and the software comprises a broad range of fully-integrated modules that can be customized or configured. These modules include supply chain management, product management, inventory control, sales, credit, and factor management, purchasing and supplier management, EDI, production, packing and distribution, accounting, and detailed, real-time reporting.

Able to work alongside all Microsoft products and other databases such as Oracle, VisualERP.net is configurable and customizable and is available in multi-language and multi-currency. It is also scalable so can suit companies of all sizes.

Visual ERP is available as a web-based product but can also be implemented by companies on-premise. Bolt-on modules can be added, including enhanced business intelligence tools, or CRM functionality.

VisualNext provides a range of partner products to enhance ERP functionality including integrated e-commerce and online payment technologies, product design software, IT security, and backup options.
